## BULK MATERIAL HANDLING SYSTEMS FULL SCOPE DELIVERIES FROM LAITEX

The Finnish company Laitex Oy was founded in 1986 and is a full-service technology house, which offers high quality bulk material handling solutions. We design and manufacture bulk material handling systems to suit the various needs of the industries we serve.

### Our products:

- rotary valves
- screw, belt and chain conveyors
- elevators, chip metering screws, reclaimers
- screens and crushers

### Full scope deliveries including:

- bulk material handling equipment
- electrification and automation systems
- buildings
- installation and commissioning
- operator training
- spare parts and service for the whole lifetime of the product

As our client you can focus your resources on what you do best – we will take care of the rest.

### Energy Industry

We have broad experience of conveyor solutions for solid fuel fired plants. We are involved in the development of solutions for energy plants, from individual pieces of equipment to complete systems. We offer solutions for fuel receiving, conveying, screening, crushing and storage, as well as for handling of ashes and sand.

### Wood Processing Industry

We are present in both the chemical and mechanical wood processing industries where we deliver conveyors and conveyor systems for various parts of the processes. In pulp and paper production our conveyor systems are used for the handling of, for example: wood chips; bark; pulp; paper filler and pigments; limestone; and recovery boiler ash. In the sawmill and board industries our systems are used for handling wood chips and bark.

### Mining Industry

We understand mineral handling and we have developed various solutions for conveying of concentrates within production and storage, and also for the cement and gypsum industries. We offer solutions for the conveying of talc, chalk, calcium carbonate, kaolin, and other industrial minerals.
